Indian Institute of Information Technology Kalyani

16/07/2019

With approval from competent authority, the following rules will be enforced with immediate effect, for students with supplementary examinations:

1. **For students with supplementary in theory courses:**

"Candidates who have re-registered in a theory course and obtained 'F' grade without submitting assignments and appearing for class-tests/mid-semester/end-semester examinations, i.e., have obtained zero marks in all components due to being absent will have to re-register again for the said theory course. They will not be permitted for the supplementary examination for that course."

2. **For students with supplementary in laboratory courses:**

"Students who have obtained 'F' grade in a sessional course due to non-performance in the laboratory classes during the entire semester will have to re-register for the said course in the ensuing session along with the next batch. No separate supplementary examinations will be conducted for such candidates. However, if a student had been performing well and missed the end-semester laboratory examination of the sessional course on medical ground and/or with valid reasons, he/she may be considered for a special examination, as deemed fit by the course instructor."

3. **For students with large number of supplementary papers:**

"Students giving supplementary exams may register for the next semester. This registration for the new semester will be conditional subject to passing/clearing all back logs. If a student fails in the supplementary examinations and has to re-register in those courses, the following will be applicable.

S. No.	Condition	Directive
1	Student has more than 24 credits* of backlogs	1. Registration for new semester becomes invalid. 2. Student has to clear the backlogs first.
2	Student has less than 24 credits* of backlogs	1. Student has to re-register for the back log papers first. 2. Student will be permitted to take courses in the new semester such that total number of credits taken does not exceed 28* including backlog papers (Slow Pace Program).

* Including theory and laboratory courses.

Maximum credit limit that a student can take may be increased on a case to case basis subject to Director's approval.
